POWER IN PRINT

As much as we're tied to our tablets, smartphones, apps and computers, there's still no substitute for holding something tangible in your hands. According to a recent research study, printed brochures, maps and guides are used as a primary source for trip planning 55 percent of the time.

During a trip, 81 percent of additional decisions are made from printed brochures, maps and guides. Seven out of ten visitors pick up at least one brochure while on a trip.
